Response to Amendment

The following is in response to the amendment filed on July 30, 2007.

Allowable Subject Matter

Claims 1-5 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art does not disclose or suggest a shoe press belt formed from elastic material and having drains formed therein, wherein the drains are formed in a pressurizing region of the belt, and the depths of the drains are progressively increased from the central pressurizing portion of the belt toward the end pressurizing portions of the belt. In prior art shoe press belts, any increase in the depth of the drains are found outside the pressurizing region and/or do not progressively increase from the center to the ends as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

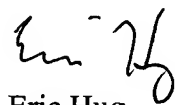

Applicant's arguments filed July 30, 2007 have been fully considered and are persuasive.

The amended claims overcome the rejections set forth previously over Yokoo et al (JP 8-13373), Steiner et al (DE 44 01 580), Matuschczyk (US 6,030,503), and Watanabe et al (WO 02/090649). Neither Steiner, Matuschczyk, nor Watanabe teaches or suggests progressively increasing depth among drains within the pressurizing region as claimed. Yokoo teaches that each drain becomes gradually deeper as it runs at an angle from the center to the two ends of the belt.
